

My Stream Is Not Updated (Flow-Flow)

For Grace Instagram Feed plugin, please follow this article ([//docs.social-streams.com/article/121-my-stream-is-not-updated](https://docs.social-streams.com/article/121-my-stream-is-not-updated)).

Install WP Croncontrol (<https://wordpress.org/plugins/wp-croncontrol/>) and check if `flow_flow_load_cache` task is present in **Tools/Croncontrol**.

Hook Name	Arguments	Next Run	Recurrence			
flow_flow_load_cache	None	2015-03-05 09:21:58 (21 seconds)	1 minute	Edit	Run Now	Delete
wp_version_check	None	2015-03-05 09:55:30 (33 minutes 53 seconds)	12 hours	Edit	Run Now	Delete
wp_update_plugins	None	2015-03-05 09:55:30 (33 minutes 53 seconds)	12 hours	Edit	Run Now	Delete
wp_update_themes	None	2015-03-05 09:55:30 (33 minutes 53 seconds)	12 hours	Edit	Run Now	Delete
wp_maybe_auto_update	None	2015-03-05 19:01:00 (9 hours 39 minutes)	12 hours	Edit	Run Now	Delete
wp_scheduled_auto_draft_delete	None	2015-03-05 20:43:11 (11 hours 21 minutes)	1 day	Edit	Run Now	Delete
wp_scheduled_delete	None	2015-03-05 21:55:52 (12 hours 34 minutes)	1 day	Edit	Run Now	Delete

Local timezone is UTC+0 UTC time is 2015-03-05 09:21:37 Local time is 2015-03-05 09:21:37

It's here

If you see that its *next run date is OK*, please consider doing the next steps.

1. Double check all authentication data and if you don't see any errors on stream page (only admins see errors above stream container if they are present) and in admin check status of the stream (on streams list you will see exclamation mark if the stream has an error).
2. Sometimes your server Cron is spammed by a lot of same tasks which can be an issue that prevents Flow-Flow updating task from functioning OK. Check for tasks with the same name in a list of tasks, for example, using Croncontrol plugin.
3. Sometimes you can reach your server capacity, and it can't handle the current amount of streams. Try to switch plugin to WP wrapper for DB operations (if you have 1.4+ plugin version). Check here ([//docs.social-streams.com/article/59-max-connections-limit-error](https://docs.social-streams.com/article/59-max-connections-limit-error)) how to enable it.

If it's scheduling is not OK like the date in the past, please ask support from your hosting provider. Tell them *WP Cron is not working correctly*.

It's not here

If you don't see tasks, you need to create a custom interval in **Settings/Cron Schedules** with the next fields:
